Hebrew Font Schemes: As the standard Linotype magazine has 90 channels and the Hebrew alphabet 31 different characters exclusive of points, figures and spaces, a standard set of Hebrew matrices for a 90-channel magazine consists of a font of one point size or face in the cap channels and another font in the lower case channels with the usual figures, points and spaces in the center channels. This combination of two different faces for one magazine is usually made up of 6 and 8 point, 9 and 11 point or 9 and 12 point. Figures and points of the smaller sizes can be used in both faces, as Hebrew in all point sizes is made on common alignment.

A combination set of the two fonts above mentioned contains 1400 matrices. A single font, including figures, points and spaces, contains 926 matrices. A font of 31 alphabet characters only contains 474 matrices. These fonts may be purchased separately or in combination.

Attention is directed to the new Hebrew No. 3 Series, shown herein, which introduces the modern sans serif design to Hebrew types. Made in both regular and italic forms, and in one-letter and two-letter combinations.

With each specimen there will be found data outlining the conditions under which the various point sizes can be run in the magazine. Some of the faces are too large to permit the use of more than one font in the magazine, while in some of the condensed faces it is possible to use two display faces in one magazine. Please be sure to consult data in connection with each face before making up your order.
KEYBOARD DIAGRAM No. 13—For two fonts of Hebrew in 90 channel magazine. Number over keybutton is character number. That under keybutton indicates magazine channel in which character is to run.

20. I express my doubts on the bases of the brilliant and daring historical and geographical deductions drawn from text C by M. Dussaud in RHR. ערבב, if "Arabs", should be spelt ערב or ערב. This root, ערב, and ערב, appears in five other cases in the text, where Arabs do not qualify. The Hebrew alphabet, 1. 75, is

Matrix Information—Will run in cap or lower case side of 90 channel layout. Length of alphabet, 120 points. 10 point alignment. Smallest slug on which this face will cast is 11 point. Code Word: Zewre, 11Δ69.

The Hebrew alphabet, as shown in the above specimen, is punched inverted, to permit insertion of words in English Text without cutting slugs and justifying by hand.
